Appendix B: Questionnaire

My name is **Mohamed Munser Saleh**, a student at the Islamic Science University of Malaysia. I am currently pursuing a Master of Computer Science in Information and Security Assurance. My research title is “**Information Security Risk Assessment of E-learning Systems: A Case Study on Global Open Access Learning System (G.O.A.L.S.) in Universiti Sains Islam Malaysia (USIM)**”. As far as any research is concerned, some findings are needed for it. The aim of this research is to examine the information security risk involving an e-learning system that have been implemented in USIM. I hope you can read the questions below carefully and tick or fill the appropriate answers which will help me in my research findings. Your suggestions and cooperation are highly appreciated. Any enquires can be forwarded to this email: mo_mon53@yahoo.com

Thank you.

Section A: Personal Information

This section is to gather personal information from the respondents.

Please tick where appropriate.

A1. What is your gender?

Male	
Female	

A2. What is your education level?

Diploma	
Bachelor degree	
Master degree	
Doctorate Degree	

Others (please specify): _____

A3. What is your position in the department?

Please specify: _____

Section B: Unauthorized release of information

This section is to gather information from respondents about security incidents involving “unauthorized release of information” that happens in G.O.A.L.S’s usage.

Please tick for Yes/No/Not Sure in the box given below.

No.	Security Incident	Yes	No	Not Sure
B1	Logon information of lecturers were intercepted and misused.			
B2	Logon information of students were intercepted and misused.			
B3	Materials online were loaded by unauthorized persons.			
B4	Materials online were accessed by unauthorized users.			
B5	Materials online were phished by unauthorized persons.			
B6	Students get unauthorized person’s help during the writing of tests.			
B7	People masquerade as students to answer tests on behalf of such students.			
B8	Hackers managed to access the system.			
B9	Crackers managed to destroy the system.			
B10	Virus or Trojan managed to attack the system.			

Other security incidents involving “unauthorized release of information” (please specify):

Section C: Unauthorized modification of information

This section is to gather information from respondents about security incidents involving “unauthorized modification of information” that happens in G.O.A.L.S’s usage.

Please tick for Yes/No/Not Sure in the box given below.

No.	Security Incident	Yes	No	Not Sure
C1	Materials online were changed by unauthorized person.			
C2	Materials online were ruined.			
C3	Materials online were lost.			
C4	Assignment sent by students was plagiarised by unauthorized person.			
C5	Assignment sent by students was ruined.			
C6	Assignments sent by students were lost.			
C7	Student’s marks were changed by unauthorized person.			
C8	Student’s marks were ruined.			
C9	Student’s marks were lost.			
C10	Quiz/test content uploaded by lecturer were changed.			

Other security incidents involving “unauthorized modification of information”

(please specify):

Section D: Unauthorized denial of resource use

This section is to gather information from respondents about security incidents involving “unauthorized denial of resource use” that happens in G.O.A.L.S’s usage.

Please tick for Yes/No/Not Sure in the box given below.

No.	Security Incident	Yes	No	Not Sure
D1	Lecturers cannot access the system due to poor bandwidth.			
D2	Students cannot access the system due to poor bandwidth.			
D3	Lecturers cannot access the system due to server problem.			
D4	Students cannot access the system due to server problem.			
D5	Lecturers could not log in to the system due to other reasons.			
D6	Students could not log in to the system due to other reasons			
D7	Lecturers get disconnected when uploading or downloading materials in the system.			
D8	Students get disconnected when accessing online materials or conducting quiz/test.			
D9	Lecturers could not upload or download files in the system.			
D10	Students could not upload or download files in the system.			

Other security incidents involving “unauthorized denial of resource use” (please specify):

 Bandar BaruNilai, 71800 Nilai, Negeri Sembilan, Malaysia

Abstract

Computers have become an integral part of our everyday existence. They are used to store and to send among students' letters and sensitive documents, materials. In today's focused world, each Organization is endeavoring to enhance its proficiency and guarantee the nature of data used. Computer networking technologies - internal, web - have progressed to the point where data can be put away, transmitted, and available to people accessing the resource anytime and from anywhere. These advantages additionally push organizations into executing web-based innovation without considering the security dangers that this involves.

Keyword

unauthorized; threats; E-learning security.

Appendix C: Brief Biodata

a) Name: MOHAMED MUNSER SALEH MANSOUR

b) Matric No. 3130152

c) Nationality: Libyan

d) Passport No: 206937

e) Qualification and University attended:

- Name of University: High Institute for Preparation of Trainers in Zleetin
- Degree: High Diploma.
- Specialization: Electronic Engineering: Division: Computer .
- Achievements: CGPA, 70.20 %, JayyidJiddan.

f) Work Experience:

- Computer technician and Trainer , from 2000 - 2012

g) Address:

- Malaysia

22-14 PERMAI PUTER JALAN 13 D
DESA PERMAI TAMAN DATO AHMAD RAZALI AMPANG 86000
SELANGOR .

- Libya

Tripoli - Al garbuli

h) Hp No. and Email Address

- G.S.M: (+6) 01114323768
- E-mail: mo_mon53@yahoo.com
